

Pyranometer data from Waterloo Central Middle School, 2005

These data have been collected on the roof of Central Middle School, Waterloo, Iowa, by science teacher Kelen Panec, using an Apogee model PYR silicon solar cell-based pyranometer. (This is an older model instrument, now superseded by the PYR-P.) The data were recorded at one-minute intervals using a 12-bit USB datalogger from Onset Computer Corporation. See http://www.pages.drexel.edu/~brooksd/DRB_web_page/pyrodata/pyrodata.htm for information about this site, and for more recent data.

Tab-delimited ASCII text files of these data are available on request from brooksd@drexel.edu.
